The four-wheeled Cariboo Team is a cross-country bicycle ideal for children who need a stable vehicle. The bike will work well for toddlers who have trouble keeping their balance, but like to spend time actively. The advantage of the bike is the intuitive turning system - the child decides the direction of travel by gently balancing the body.

cariboo friends

Cariboo Friends is a ride-on bike designed to help your little one learn all about balance! Cariboo Friends features only one rear wheel and lets your kid learn to balance- which will be so important at a later stage when riding a balance bike. And the two wheels at the front will make it easier to get on and off the bike.

- SUITABLE FOR **1+**
- ADJUST **5** HANDLEBAR ANGLE
- HANDLEBAR TURNING LIMITER
- LOW WEIGHT LOW WEIGHT
- ADJUSTABLE SADDLE
- EVA FOAM WHEELS

Magnesium Pro | balance bike

Feather Light, mighty strong – only 2.50 KG! Cariboo Magnesium Pro is one of the lightest balance bikes on the market. The lighter the bike, the easier it is for a child to learn the basics of bike riding. Made of magnesium alloys – magnesium alloy, used in the production of professional cross- and road bikes, is a perfect material for the frame of a balance bike due to its properties.

Classic | balance bike

Feather light, mighty strong!
You'd better believe it!
Cariboo Classic is only
2.60 Kg. This is an awesome
balance bike that- thanks
to how lightweight it is- will
help your little one practice
riding on two wheels. It is
suitable even for a two year
old toddler.

Caribboo LEDstar

light-up scooter

multi LED lights

The LEDstar balance scooter by Caribboo is equipped with three wheels, an adjustable-height handlebar and a foot deck which lights up after pressing one button. That's not all though, as the deck can shine in a single colour or in all the colours of a rainbow. The lights can pulsate, flow or flash. The scooter gives a child many ways to enjoy good fun!
